

Crossword

Cute Insects

Spot the Difference: There are three differences in these two pictures.
Can you find and circle all three?

Did you know?

- Ladybugs are a type of beetle.
- There are about 5,000 different species of ladybugs and they come in many different colors and patterns.
- An adult ladybug can eat up to 50 aphids a day.
- The color of the ladybug sends off the message to its predators that it may taste bad or be poisonous.
